BlockChain

This project simulates a **Hyperledger Fabric** blockchain system for verifying academic credentials. It allows:

1. **Issuing Credentials:** Universities issue immutable degree records.
2. **Verifying Credentials:** Employers verify the authenticity of a degree using the credentialId.
3. **Revoking Credentials:** Institutions can revoke a degree (e.g., if issued in error), rendering it invalid.

The system uses a **Smart Contract (Chaincode)** written in Node.js and a local verification script to simulate the blockchain ledger logic without requiring a complex .
